Project Experience

Days - <https://michalis-mel.github.io/Travel-Project/>

Developed a sample dynamic website for a travel agency using JavaScript. Coded layout, design and animations from scratch using HTML, CSS, Gsap, ScrollMagic and BarbaJs.

SQL Library Manager - <https://github.com/Michalis-Mel/TechDegree-Project-8>

Created a web application for a fictional library to help them manage their collection of books. The layout was coded with HTML and CSS. The functionality of the application was coded from scratch using Javascript, Node.Js, Express, Pug, Sequelize ORM and SQLite.

Ignite - <https://michalis-mel.github.io/ignite-movies-redux>

Built an interactive web application that pulls data from an API with Axios and inform the users about some upcoming, popular or new games. The layout and the functionality for this website were produced with HTML, CSS, Styled Components, Framer Motion, JavaScript, React, Redux, React Router.

School Database Manager - <https://github.com/Michalis-Mel/TechDegree-Project-10>

A Full Stack React App with Rest API to provide a way for users to administer a school database containing information about courses. In addition, the project will require users to create an account and sign in to make changes to the database. Technologies used for this project: HTML, CSS, JavaScript, Express, Sqlite3, Sequelize, Cors, Bcrypt, Axios, React, React Router.
